Quinten 5-Piece Armless L-Shaped Sectional (112"), West Elm, ~\$4 445

shop now

This sofa is recommended because it matches the criteria of a big, low sofa suitable for relaxing with company and pets. It is very soft (1 out of 5 on the firmness scale, where 5 is the firmest), allowing for deep relaxation. It has a deep seat, which adds comfort. The sofa is large and comes in several upholstery options.

The recommended upholstery is Performance Chenille Crossweave, Elm. It gives the sofa a beautiful green color, which aligns with the stated preference for green sofas. The shade isn't too dark, so the sofa fits well in the interior. It's also not too light, making it less likely to show stains — an important consideration in a pet-friendly home.

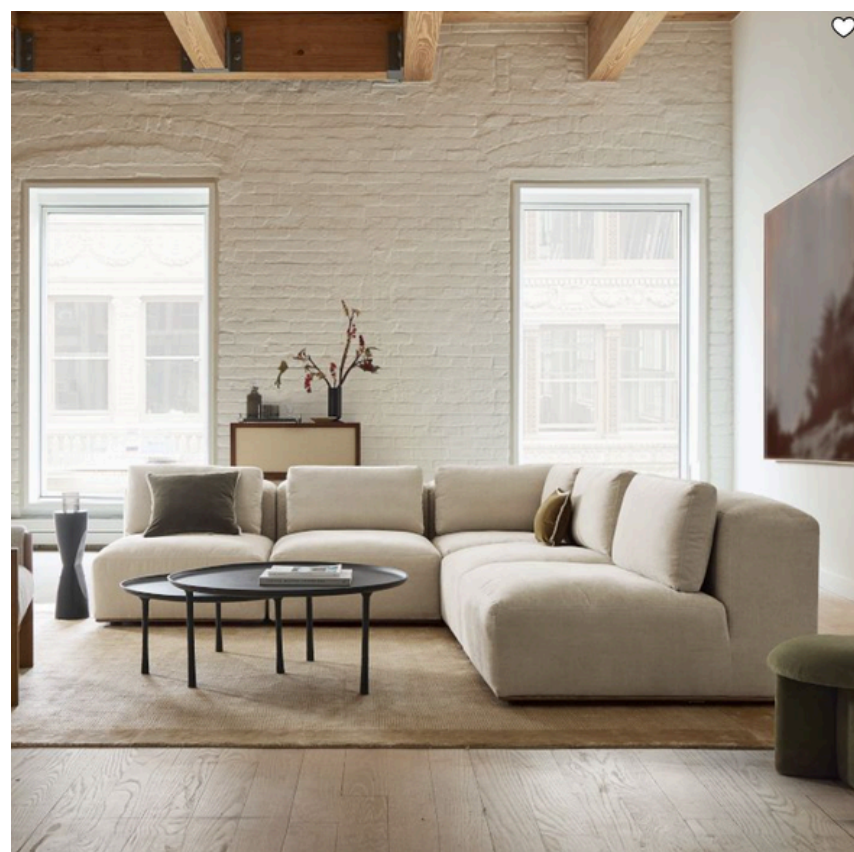

The only downside is that this upholstery costs a bit more than the planned budget. If price is critical, the Silver Twill upholstery is an alternative. With that option, the sofa costs \$3,195.

For a lighter upholstery, Sand, Performance Chenille Tweed is another option. With this fabric, the sofa costs \$4,195.

All three upholstery options fit perfectly in the designed interior. Other sofas can be considered as well, but it's important that any alternative is about the same size. The overall dimensions are 112.3"w x 112.3"d.

I also thought about [Laurent sofa](#) \$3 847, but in my opinion it'll be less comfortable: Seat firmness: Medium (rate 4), and Seat depth smaller 23.5" vs. 25.2". Nevertheless, this sofa will look beautiful in your interior too.

Cozy Swivel Chair, West Elm, ~\$649

[shop now](#)

This chair was added to the project because it matches a preference for chairs with smooth shapes.

This option is also very functional. The chair has a swivel base, making it easy to turn toward the kitchen area or the sofa for conversation. It's also comfortable for watching TV.

The chair is spacious and would be a great visual addition to a kitchen-living room area. Several upholstery options are available. A good option price-wise is Sand, Twill. However, Sand or Ivory in any fabric type the seller offers would also work.

The chair in these colors will look great in the interior, regardless of fabric texture.

Black Oak Bok Dining Table, Ethnicraft, ~\$3 039

[shop now](#)

The Bok dining table from Ethnicraft was added to the dining area because it aligns with a preference for wood texture and natural materials. Ethnicraft is known for exceptional craftsmanship in natural wood, and this table has consistently received positive feedback in past projects.

Available sizes: 79" or 87".

This option is significantly over budget but worth considering for the quality.

Another option is the [In Between Rectangle Dining Table](#) from &tradition, designed by Sami Kallio. It also fits perfectly in the dining area in size Small: 78.7" width, and is slightly cheaper at \$2,925.

There's also the [Branch Dining Table](#) for \$1 836 in size Small: 75.7" width, which will also fit great.

You can also consider the [Anton Solid Wood Dining Table](#) (72", 86", 120") in size 72" (seats 6) or 86" (seats 8) for \$1 299–\$1 499, or the [Parker Extendable Dining Table](#) (60"–92") for \$1 519.
